EDUCATION:

NUST SEECS <i>BS Computer Science</i>	Aug 2023 – Aug 2027
McKinsey Forward <i>McKinsey & Company</i>	April 2026 – June 2026
Founders Institute <i>Graduated founders Institute under NIC Pakistan Cohort 3</i>	Jan 2025 – Sep 2025
PCS Faisalabad (90.5%) <i>O-Levels</i>	Nov 2020 – Mar 2022

EXPERIENCE:

Software Engineering Intern Wateen Telecom	May 2025 – Aug 2025
Worked as coder in an agile development team , learned to work with PERN stack at scale , handled auth, db schema, migrations, API creation and testing, learned to optimize the code through lazy loading and better system design principles. Selected out of 5000 applicants, for a large scale B2B telecom brand in Pakistan.	
Growth Engineer Leetly (US-based edtech)	Nov 2024 – Jan 2025
Drove user adoption for a mobile-based DSA learning product through data-driven growth experiments. Learned how sales funnels and pipelines work, and how they are optimized	
Content Engineer REM / IT Empire	Sep 2024 – Nov 2024
Built content strategy and brand voice for an AI B2B SaaS helping realtors matchmake properties at startup stage.	

PROJECTS:

H1GROW —Content Monetization, Web, AI

Helps creators **5x their revenue** by monetizing their content through software products.

JAVASCRIPTPETER- JavaScript content Instagram page.

Built an **automated content pipeline** using Python + OpenAI API that generates, produces, and schedules short-form technical videos, from simple **Prompts** —Grew to **7.5k+ followers and 3M+ views within 2 months**, **validating pipeline output quality at scale**. Creates simple bite sized JS content, for scalable projects, new AI tools, interviews, DSA and JS syntax.

TOPICPULSE— Web scraping, NLP, Python, Flask

Content gap identifier for Medium writers. Scrapes Stack Overflow to surface high-demand questions with low answer coverage, runs sentiment analysis on existing Medium articles covering those topics, and recommends underserved writing opportunities ranked by demand and gap size

WATIFY—Inhouse communication solution for Wateen telecom .

Is an internal comms platform serving **5,000+ Wateen employees** and I engineered the full backend for it -- built REST + GraphQL APIs, handled DB schema migrations (PostgreSQL), implemented JWT authentication and lazy loading for scale. Stack: PERN, WebSockets. scalability and design thinking.

Project Memetent —A compilation game made in Java, Swing, FX

60% boost in interaction and a **14% higher click-through rate**, because of the responsive memes added to the classic games we love

Karobar box —Validates your transaction instantly with audiovisual messages

Incubated in NIC Pakistan **selected 1 of the 30 from 570**, [Implemented as a lean startup](#)

SKILLS:

Languages: Python, JavaScript, Java, C/C++, SQL

Backend & Databases: Node.js, Express, PostgreSQL, MongoDB, MySQL, Redis, REST APIs, GraphQL, WebSockets, Spark, Hadoop

Frontend: React, Next.js 14, Tailwind CSS, Framer Motion, HTML/CSS

Data & AI: Pandas, NumPy, NLP (NLTK/spaCy), TensorFlow, Scikit-learn, PyTorch, Flask, N8N, Prompting

DevOps & Tools: Git, Docker, Nginx, Vercel, Linux, Salesforce, OpenClaw, Agile/Scrum

Relevant Coursework: Data Structures & Algorithms, Distributed Computing, Deep Learning, Big Data Analytics, Compiler Construction, Software Engineering, Database Systems, Probability & Statistics, Computer Networks
